OS: Windows, Linux

System Admin: Windows Servers, SQL Servers, Email Servers, DNS Servers, VMWare Left Hand

Processes: Disaster recovery, change management

Portfolio

Tracking Mike - Currently maintaining & developing

<http://www.mikepearce.us/>

Personal blog and photo gallery. Originally coded in ASP from the ground up in 2006. A later upgrade changed the design into a tableless format & added a C#.NET component to watermark, dynamically resize, and cache photos. In 2010 it was converted to PHP & MySQL and Gallery3 was added for photo management. Started using YUI3 in January 2010 for various features, like search autocomplete, keyword highlighting, and overlays containing the matching photo thumbnails of a keyword on the page.

Bank of Utah - Formerly maintained

<http://www.bankofutah.com/>

Site design and original code created by a marketing agency using tables. HTML code was broken down into PHP templates for easy code reuse and maintainability. All other work, including page content, on this website was created by myself.

Moab Sports - Formerly maintained & developed

<http://www.moabsports.com/>

My Ade a - Formerly maintained & developed

<http://www.myadea.com/>

Designed the shopping cart, and back end currently in use in ASP.

Work Experience

Bank of Utah, Ogden, UT

Apr 2007 – Apr 2009

Web Application Developer

- Develop and maintain www.bankofutah.com Languages used include: HTML, JavaScript and PHP.
- Implement, administer and maintain the company's intranet (Plone) with HTML JavaScript, ASP and AJAX.
- Develop internal applications to track various company processes, for internal auditing, federal auditing, and compliance tracking to name a few. Applications have also been developed to reduce paper, expedite form approval and processing, increase internal communication, enhance employee relations, integrate with existing company software, and decrease overall operation costs. Languages used include HTML, JavaScript, ASP, PHP and SQL (Microsoft SQL Server).
- Develop a secure file transfer system to allow partners to send large files with ease and security to specific people inside the company and vice-versa. Languages used include HTML, JavaScript, PHP and SQL (MySQL Server).

The Sock Company, Montvale, NJ

Dec 2001 – Apr 2007

Web Application Developer

- Create and maintain e-commerce websites, as well as custom solutions to enhance and streamline the business processes.
- Sites created include:
www.amazingsocks.com
www.moabsports.com
www.myadea.com
- In addition to the public sites there are also secure administrative sites for maintaining product information, order processing, statistics, and reporting. An in-house affiliate program was also developed. It provides statistics, reporting, and tools to assist each affiliate with product promotion. An in-memory data caching system was coded to reduce database load and speed the retrieval of frequently accessed data.
- Responsibilities include installing and maintaining servers and all the necessary software, planning and executing projects, creating databases, programming, and maintaining existing infrastructure.
- Languages used for these projects include: HTML, JavaScript, ASP, AJAX, and SQL (Microsoft SQL Server).

Convergys, Orem, UT

Feb 2001 - Jan 2002

MikesDesigns.NET
College of Eastern Utah
Web Developer

Nov 2001 - Dec 2003
Dec 1997 - Jan 1999

- Develop web solutions for businesses as well as organizations, or individuals depending on their needs. Utilized skills in programming with different languages such as HTML, DHTML, JavaScript, and ASP.
- Designed web pages and computer graphics for departments of the College of Eastern Utah including: English, Art, Geology, Theater, Admissions, and the College Catalog.

Extra Professional Activities

Sabbatical

Jun 2009 - Dec 2009

Due to a difficult job market, it was decided to sell the house, car, and many possessions in preparation for a move to an area with a broader job market. The circumstances of a temporarily unburdened life also permitted some lengthy travel throughout Western Europe. During this time, numerous life skills were learned on new levels: adaptability, problem resolution, stress management, budgeting, planning, self-reliance, independence, and verbal & non-verbal communication within different societies.

North Ogden Trails Committee

Jun 2006 - Aug 2009

Was invited to participate in this committee to help plan and influence the development of urban and recreational trails in and around the city of North Ogden, UT. Working as volunteer citizens, we helped to provide a link between the community, its civic leadership, and the many organizations which help us to reach our goals, as well as participate, hands on, in trail building.

Languages

English - Native tongue

French - read, write, speak
